

Carbon Footprint Report

Organization Name: Test

Industry: Manufacturing

Number of Employees: 100

Metrics

Results

Energy Emissions (kgCO₂): 2783.11

Waste Emissions (kgCO₂): 133.20

Travel Emissions (kgCO₂): 11.55

Total Emissions (kgCO₂): 2927.86

Overall Carbon Emissions Recommendations

Message: Our carbon footprint calculator has concluded that your organization generates a moderate number of KG of CO₂ each month. You can improve further.

- Adopt circular economy principles by reusing and recycling resources.
- Commit to environmental certifications, such as ISO 14001, to formalize sustainability efforts.
- Share sustainability achievements transparently to inspire stakeholders and peers.

Recommendations for each of the items

Electricity Consumption: 50.0

Recommendation: Your electricity consumption is moderate. Consider improving efficiency.

Natural Gas Consumption: 25.0
